

vinylit **Multipaneel**

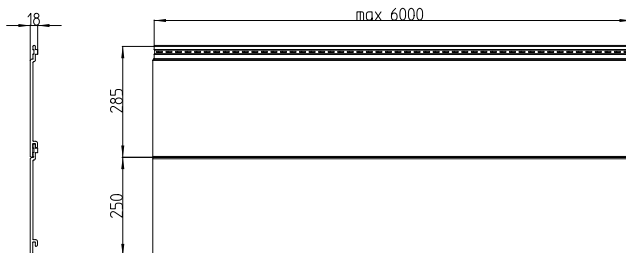

Fassadenprofil Holzstruktur geprägt / *Facade profile wood texture embossed* / Bardage type bois structuré

Das Multipaneel ist eine attraktive Alternative zu Holz. Während eine klassische Holzfassade regelmäßig nachgestrichen werden muss, behält die Multipaneel Fassade ihre Strahlkraft über viele Jahre.

The vinylit Multipaneel with wood texture is an attractive alternative to wood and render. While a classic wooden facade has to be repainted on a regular basis, the vinylit Multipaneel facade retains its appeal for many years.

Le Multipaneel Finition Bois est une alternative attrayante aux façades bois ou enduites. Alors que des façades traditionnelles en bois demanderont des remises en peinture régulières, les bardages Multipaneels de Vinylit conservent leur éclat de nombreuses années.
